

Can a switch be connected to a fiber optic cable in the home

Overview

A fiber-optic switch allows you to connect two or more fiber-optic cables to form a network. These can behave like a typical Ethernet switch. Network topology refers to the way in which the links and nodes of a network are arranged in relation to each other. This article aims to provide a comprehensive understanding of how network switches are connected to fiber. Something like Router -> RJ-45 cable -> RJ-45 to Fiber -> Fiber cable through the wall -> Fiber to RJ-45 -> RJ-45 cable -> computer (or eventually a switch). This guide will. As we speak I just have optic fibre (Community Fibre) connected to my Huawei modem / Linksys Velop which will be connected to a new POE switch (need to identify the best model to be compatible with my optic fibre extension project).
