

Dedicated for Level 3 Distribution Box

Overview

Install the Level 3 surge protection device inside the equipment or at the equipment's power supply input, especially for critical or sensitive electronic devices. Technical Requirements Maximum discharge capacity: 20kA per phase or lower. Voltage protection level: $\leq 1800V$. The construction power distribution cabinet is designed specifically for the special situation of the construction site and complies with the relevant construction electricity specifications and standards of the construction department. The complete set of products can form a complete three-level. Essential Rules for Three-Level Power Distribution System Design 1. Hierarchical and Branch Circuit Distribution (1) Power distribution from the primary main distribution board (distribution cabinet) to secondary distribution boards can be branched; that is, one main distribution board may supply. How is the grade planning of general distribution box carried out?
