

Enable optical port on switch S2000

Overview

To activate or enable a port on your Cisco Switch, connect to your Switch and type "show interface status" to see which ports are enabled and which are disabled. Type enable, then use configuration commands to set up the port you want to enable. Once the transceiver and fiber optic cable are plugged in properly in the switch optical module, you should be able to view the. To enable SFP on a Cisco switch, you need to follow a few steps. Before enabling SFP, it is important to verify the SFP module compatibility and refer to the compatibility matrix provided by Cisco. Additionally, identifying module information helps detect coding. The HUAWEI S2000 Series Ethernet Switches are L2 Ethernet switches that offer wire-speed switching functionality and support a range of features for broadband access to the Internet, enterprise and campus networking, including VLAN, STP protocol, broadcast suppression, multicast, QoS/ACL, link.
