

## Finished 90-degree elbow cable tray

### Overview

The 90° Vertical Elbow provides essential support and enables seamless cable management throughout your cable routing system. Class 1: Designed for use with NEMA Classes 12B and 12C cable trays. The nVent CADDY Wire Basket Tray PreForm Elbow 90° is a precision-engineered solution designed to streamline cable tray installations when a directional change is needed. With its pre-galvanized steel base and interlocking polymer sidewalls, the PreF. Standard 12", 24" and 36" radius are available for all fittings. These systems have 1 1/8" wide side. Wire and Basket Tray, Preformed Radius 90 Degree Elbow, 4" Wide X 12" High, Pre-Galvanized Hubbell Wiring Systems offers a comprehensive Wire Basket Tray System to handle every application. From pre-galvanized solutions for commercial controlled interior environments to stainless steel versions for. Creating a 90-degree elbow in an electrical cable tray, often called a "fabricated" or "mitered" bend, involves cutting, bending, and fastening a straight section of tray. The most common method involves creating two 45-degree cuts to form a 90-degree angle. A 90-degree cable tray is a crucial component in electrical and data infrastructure systems, enabling smooth directional changes in cable routing while maintaining organization, safety, and accessibility.
