

# KVM switcher cannot automatically switch

## Overview

Solution: First, check if the switch's power indicator light is on and ensure the power source is properly connected. If there's a power switch, make sure it's in the "On" position. We will now introduce some of these problems and provide solutions to help you make better use of a KVM switch. Problem 1: The KVM. Do I get it right that PG32UCDM built in KVM doesn't switch input from USB-B to USB-C automatically when video source is changed from DP/HDMI to USB-C?

User has to manually open monitor menu: System Setup -> USB Setup -> KVM and choose KVM input corresponding to the selected device?

And this menu. This guide helps you troubleshoot common issues with KVM switches and provides solutions for getting dual monitor setups working. My Core Problem: The monitor does not automatically switch the USB input (and thus my peripherals) to the currently active video input. I have a primary videoconferencing machine plugged in to a TV, and would like a KVM switch that will auto switch to a secondary machine if it is plugged in, then switch back to the primary if.
