

# No internet connection even when connected to fiber optic router via Ethernet cable

## Overview

Quick Answer: 1) Unplug ethernet cable from both ends, wait 10 seconds, replug. If still broken, try a different cable and port. Having a wired internet connection can often provide a more stable and faster internet experience than Wi-Fi. This issue can stem from various causes, including. However, my PC is connected to the router via ethernet (through a power-line adapter) and i haven't been able to get the PC's internet working again. I've tried flushing the DNS, using default IP settings for the connection, restarting the router, modem, and PC, using the network reset button. Your Ethernet cable is plugged in, but your computer still says no internet connection?

The problem usually stems from a misconfigured network setting, a faulty device along the path (router, modem, or even the Ethernet cable itself), or a simple driver issue. My Asus GT-AX11000 running Merlin WRT version 386. Ensure that the Ethernet adapter is.
