

Pricing for Fiber Optic Communication Scenarios

Overview

CRU provides comprehensive, accurate and up-to-date price assessments and research reports for bare optical fibre across various key regional markets, combined with insights into the factors and events affecting markets. This executive briefing on trade (EBOT) will examine the relationship between fiber optic cable input costs, specifically silica tetrachloride, helium, and energy, and the demand forces that have increased the price of fiber optic cable. Fiber optic cables transmit data in the form of light through. Fiber-optic cable materials typically cost \$1 to \$6 per linear foot, depending on fiber count and cable type. Commercial building installations with 100-200 network drops generally range from \$15,000 to \$30,000. The main cost drivers are materials, installation time, and environmental factors that affect trenching, conduit, and terminations.
