

# Steps for removing optical fiber cables

## Overview

In this informative guide, we'll walk you through the step-by-step process of stripping and preparing fibre optic cable for termination, covering techniques, tools, and best practices to help you achieve successful terminations in your fibre optic installations. Fiber optic cables provide blazing-fast internet speeds through pulses of light transmitted over glass fiber. However, situations may arise requiring you to disconnect these specialized cables from modems or routers. Termination involves attaching either a removable connector or a permanent splice to the fiber's end so it can mate with other fibers or. A fiber optic cable uses extremely thin strands of glass or plastic to transmit data as light pulses, allowing for high-speed internet connections. Removing these cables from specialized equipment, such as an Optical Network Terminal (ONT) or fiber gateway, requires different precautions than.
